Cairo SAM site located at 30-05N 31-36E, observed on [REDACTED] is the only site which appears to be occupied. At that time the site contained six launchers in revetted positions and an occupied, revetted guidance area. No missiles or missile containers could be observed in the vicinity of the SA-2 sites or the support facilities. Since most of the sites have been observed only on KEYHOLE photography, it is not possible to confirm or negate their operational status.
